EXPERIENCE

Software Development Intern | EventEase -Remote / NJ

Sep 2025 – Dec 2025

- Delivered two greenfield React 19 + TypeScript SPAs and extended a live tournament-scoring platform, building responsive interfaces optimized across mobile, desktop, and 4K TV displays.
- Architected modular frontend systems using Redux Toolkit and reusable shadcn/ui components, enabling shared component libraries across multiple applications.
- Integrated end-to-end REST APIs for authentication, scoring, leaderboards, and media uploads using Axios, implementing centralized error handling and user feedback mechanisms.
- Implemented near-real-time leaderboard synchronization through optimized polling across web and TV clients; collaborated through Git-based code reviews and pull requests.

Software Developer | TechBilv Solutions LLP -Gandhinagar, India

Jan 2023 – Aug 2024

- Enhanced client-facing React applications by rebuilding core UI components and navigation flows, improving usability and maintainability.
- Managed production deployments to AWS-backed IIS servers and configured static site hosting on AWS S3.
- Embedded a third-party AI chatbot and partnered cross-functionally with design and client stakeholders to deliver features on schedule.

PROJECTS

AI Resume Tailoring Platform | FastAPI, React, TypeScript, WebSocket, LLM Agents

- Engineered a full-stack platform that transforms master resumes and job descriptions into ATS-optimized outputs using a multi-agent LLM workflow for analysis, generation, and verification.
- Developed a FastAPI backend with job queueing, response caching, cost estimation, audit logging, token authentication, CORS configuration, and path-traversal protection.
- Designed a React + Tailwind dashboard with real-time WebSocket streaming, live execution logs, and PDF preview functionality.

MRTD Validation System (ICAO TD3) | Python, Automated Testing

[GitHub](#)

- Developed an end-to-end MRZ encode/decode and validation engine with Damm-based check digits and structured mismatch reporting.
- Authored 15-unit tests achieving 86% test coverage, executed mutation testing (406 mutants, 137 killed), and benchmarked performance at ~156K decodes/sec.

SortBoard | React 19, TypeScript, Vite

[Demo](#) | [GitHub](#)

- Created an interactive sorting visualizer supporting six algorithms using generator-based execution and custom hooks for pause, resume, and speed controls.
- Deployed via a Vite + GitHub Pages CI pipeline, emphasizing modular architecture and responsive interaction patterns.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C++

Frontend: React, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, shadcn/ui, Vite

Backend & Data: FastAPI, Node.js, Express.js, REST APIs, WebSocket, PostgreSQL, MongoDB

Cloud & Tools: AWS (S3), Git, GitHub, CI/CD

Testing & Practices: React Testing Library, Unit Testing, Agile/Scrum, Code Reviews, REST API Design, Responsive UI, Accessibility, OOP, Data Structures & Algorithms, LLM Integration

EDUCATION

Stevens Institute of Technology -Hoboken, NJ

Sep 2024 – May 2026

Master of Science in Computer Science | GPA: 3.9/4.0

Government Engineering College, Gandhinagar -India

Jun 2019 – Jul 2023

Bachelor of Engineering in Computer Engineering | CGPA: 8.33/10.0

CERTIFICATIONS

- Claude Code in Action** -Anthropic
- Advanced Prompt Engineering** -LinkedIn Learning
