EXPERIENCE

Software Development Intern | EventEase – Remote / NJ

Sep 2025 – Dec 2025

- Delivered two greenfield React 19 + TypeScript SPAs and extended a live tournament-scoring platform, building responsive interfaces optimized across mobile, desktop, and 4K TV displays.
- Architected modular frontend systems using Redux Toolkit and reusable shadcn/ui components, and integrated end-to-end REST APIs (auth, scoring, leaderboards, media uploads) with centralized error handling.
- Implemented near-real-time leaderboard synchronization through optimized polling across web and TV clients; collaborated in a Scrum team through Git-based code reviews and pull requests.
- Shipped daily with AI-native development tools (Claude Code, Cursor, GitHub Copilot) alongside ESLint and established patterns to accelerate delivery while keeping code consistent and maintainable.

Software Developer | TechBilv Solutions LLP – Gandhinagar, India

Jan 2023 – Aug 2024

- Enhanced client-facing React applications by rebuilding core UI components and navigation flows, improving usability and maintainability.
- Managed production deployments to AWS-backed IIS servers, configured static hosting on AWS S3, and embedded a third-party AI chatbot into client products.
- Partnered cross-functionally with design and client stakeholders to scope requirements and deliver features on schedule.

PROJECTS

AI Resume Tailoring Platform | Python, FastAPI, Next.js, TypeScript, LiteLLM, Docker

[GitHub](#)

- Engineered a full-stack platform that transforms a master resume and job descriptions into ATS-optimized outputs using a multi-agent LLM workflow for analysis, generation, and verification.
- Built real-time generation and ATS evaluation over Server-Sent Events, streaming LLM output, keyword-match scores, and fit critiques to the UI, with LiteLLM providing provider-agnostic access to Anthropic/OpenAI-compatible models.
- Verified the system with 89 backend unit tests and 13 Playwright end-to-end tests, including a deterministic LLM mock mode for CI-safe evals; shipped as a single Docker container serving API and frontend.
- Orchestrated development with a spec-first, multi-agent Claude Code workflow (design docs, 7 implementation plans, parallel agent builds).

Financial QA Bot | Python, LLM APIs, Data Analysis

[GitHub](#)

- Built a CSV-driven financial question-answering pipeline with a dual-mode engine – LLM-backed reasoning (OpenRouter) with a rule-based fallback – returning year-specific insights in plain English.
- Generated automated JSON reports, high-resolution charts, trend detection, and derived ratios (net margin, ROA, asset turnover) to support financial decision-making.

MRTD Validation System (ICAO TD3) | Python, Automated Testing

[GitHub](#)

- Developed an end-to-end MRZ encode/decode and validation engine with Damm-based check digits and structured mismatch reporting.
- Authored 15 unit tests achieving 86% coverage, executed mutation testing (406 mutants, 137 killed), and benchmarked performance at ~156K decodes/sec.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C++

Applied AI: LLM APIs (Anthropic, OpenAI), Multi-Agent Workflows, RAG, Embeddings & Vector Retrieval, Evals & LLM Testing, Prompt Engineering, LiteLLM, MCP

AI-Native Development: Claude Code, Cursor, GitHub Copilot (daily drivers)

Backend & Frontend: FastAPI, Flask, Node.js, Express.js, REST APIs, SSE/WebSocket, React, Next.js, Redux Toolkit, Tailwind CSS, PostgreSQL, MongoDB, SQLite

Cloud, DevOps & Testing: AWS (S3), Docker, Git/GitHub, CI/CD, Playwright, Unit & Mutation Testing, Agile/Scrum, Code Reviews

EDUCATION

Stevens Institute of Technology – Hoboken, NJ | M.S. in Computer Science | GPA: 3.9/4.0

Sep 2024 – May 2026

Government Engineering College, Gandhinagar – India | B.E. in Computer Engineering | CGPA: 8.33/10

Jun 2019 – Jul 2023

CERTIFICATIONS

Claude Code in Action – Anthropic | AI Fluency: Framework & Foundations – Anthropic | Advanced Prompt Engineering – LinkedIn Learning | Bloomberg Market Concepts
